Seckinger 4873C — “Robot On The Loose!”

**Kobi Hien Dao, Rafiqul Alam, Khounsanoek Xayavong, Brody Baker, Maxwell
Orwin**

In our photograph, we wanted to create a large scale, with our robot being the center of our photograph. We wanted to convey a feel of chaos in the image, just like the team dynamic we have. To represent our team dynamic, we created the photograph where our team is positioned around our focus, which is our robot. To represent our team's chaotic dynamic, we positioned two of our members, Quil and Kobi, running away from the robot and one of our members, Khoun, is being trampled by our robot. As Brody drives the robot, Maxwell is leaning against the robot. The purpose of the robot being the focus of our photograph is because it is the symbol of our team. Despite our chaotic nature in the team, our common motivation of robotics pulled us all together to collaborate on engineering the best robot we could no matter the circumstances we may face.
