

## 10173X Poster Design Entry.

**Our process of making this poster involved multiple carefully planned steps.**

**We brainstormed and created plans and sketches of our poster design, before conducting research and conducting surveys to understand what would attract someone to join VEX Robotics and what parts of the process would be best to highlight. We then improved and refined our poster, evaluating it before submission.**

**10173X HBS Momentum
